Marines Advance From Torcy, and French Improve Positions-100 Prisoners Left With Americans in One Attack-French Win Back Flanders Position.

WITH THE AMERICAN ARMIES IN FRANCE, June 8 (United Press).-American marines and adjoining units again drove forward northwest of Chateau-Thierry to-day. German counter attacks were blocked by the American advance.

At the same time the Germans attacked an adjoining unit, losing a hundred men and suffering a complete repulse. The American loss was inconsequential.

Less than an hour later the Germans attacked the marines who are holding Bouresches (two miles southeast of the previous attack against the marines). The marines, who had been strengthened during the night, repulsed the enemy with sanguinary losses. AMERICANS GAIN NEAR TORCY.

During the night the Americans attacked at the right of Torcy, advancing a third of a mile and holding their gain. The Americans found the ground covered with unburied Germans, as well as many new graves marked by German helmets. Here the Germans had due in, but

There are evidences that the German elements are again receiving tresh reinforcements in an effort to hold the Americans.

Artillery fire, which had been incessant along Belleau wood throughout the night, increased in volume about 4 A. M. At that moment the stage of the Metropolitan Opera "We had a lively excert of British every detail of those awful hours right wing of the marines attacked in the south part of the wood, where the Germans had retained a foothold. The success of this attack has not been fully reported, although numerous prisoners have been sent back.

Indications are that the Americans eliminated the enemy north of the sunken road between Torcy and Belleau (a front of about a mile).

At 12.30 the enemy attempted to advance. Their infantry was supported by artillery and machine guns, and their attack was preceded by a barrage of gas shells and clouds of poisonous smoke,

The marines donned their gas masks and stopped them, 400 yards from the trenches, with artillery and rifle fire.

NEW KIND OF POISON SMOKE.

The checkmated Germans to-day produced a new weapon intended to discomfit the fighting marines. This weapon consists of poisonous smoke clouds. They differ from the usual gas clouds in that they come

The only effect which can be observed thus far is a nausea, though he enemy is making a practice of mixing gas shells with the smoke clouds, so as to necessitate the use of gas masks.

### IN U.S. VICTORY AT CANTIGNY FRENCH CONTINUE PRESSURE; **GUN BATTLE ON THE AISNE**

Carry Their Lines Forward to the Western Outskirts of Dammard and Bring Back Prisoners. FRENCH REPORT

PARIS, June 8.-Following is the text of to-day's War Office re-

"South of the Aisne there was great artillery activity, notably in the region of Faverolles and southeast of Ambley. The French improved their positions during the night and south of the Ource continued their pressure and realized new progress.

"The French have carried their lines as far as the western outskir's of Dammard and east of Chezy and more than a kilometre north of Venilly-la-Poterie. They have taken about fifty prisoners.

"Further south the Germans made two violent attacks against posttions reconquered by the French on the front from Bouresches to La
